Carbon, Alberta Phone 17

During 1926 and to date 82 improvements have been made in the EORD cars.

We list below a few of them:

- 1 Holley Hot Plate Vaporizer
- 2 Special Oil Retainer (stops all leaks at crank shaft)
- 3 Improved Fan Pulley
- 4 Improved Cylinder Head Outlet Connection
- 5 Improved Fan blade pitch increased)
- 6 Coil Box under hood
- 7 Redesigned Switch Assembly
- 8 Redesigned Ammeter
- 9 Redesigned Horn Assembly
- 10 Valve Cover Plate (no hole) quieter
- 11 Wider Brake Drum
- 12 Transmission Cover bolted to engine block
- 13 Anti Vibrator Stay Rods
- 14 Magneto Contact Assembly Redesigned (screws in cover)

By improvements such as these the Ford standard of quality is kept up.

When you buy a Ford you get a model which has tested by years of experience.

LITTLE ITEMS OF LOCAL INTEREST

A public meeting will be held in the Municipal hall on Friday evening, April 22, at 8.30, to discuss the formation of a Canadian Club. All business men are requested to be present.

—Registered Hereford Bull For Sale or will trade for young cattle. Phone Walker, 907, Carbon.

D. Stacy left for Calgary last Saturday.

Among the Calgary visitors over the Holiday were: Mrs. Malton and Molly, Mrs. A. McLeod, Miss Johnson, Mrs. McKibbin and Miss Ethel Wright.

Mr. and Mrs. G. McGregor and Mr. and Mrs. R. McGregor went into Calgary on Good Friday.

Mr. and Mrs. Barr and Miss Petrie drove into Calgary on Sunday and from there they went to Carstairs, where they visited for a few days with friends, being delayed by the recent storm.

I. Guttman and H. A. Wiertz motored to Calgary on Sunday.

School reopens again on Monday after ten days Easter holidays.

Geo. Oliphant, Alex Poxon, Jim Smith and Lawrence Poxon went joy riding last Sunday evening to Rockyford and were caught in the snow storm that evening. They remained in Rockyford all that night and went to Drumheller the next day, returning to Carbon on the C.P.R. special.

The dance advertised for Monday night has been postponed till May 24th.

The C.P.R. train on Monday was over six hours late, the cause being a wash out in the track about four miles this side of Acme. A number of car loads of cinders were hauled and the track was soon re-enforced enough to permit the train to pass over safely.

There was no mail service on Monday, the snow storm being too severe for Len Hay to make the trip by team. However, the service was continued on Tuesday, and now Mr. Hay is again driving his car to Grainger.

Mr. and Mrs. P. Edwards and family spent a few days in Calgary this week.

Mr. and Mrs. L. Poxon and Mrs. Bruels motored into Calgary on Sunday afternoon. They returned on the train Wednesday.

R. McKinnon and J. O'Rourke also spent the Easter holiday in the city.

Frank Seymour motored into Calgary on Saturday evening and started for home Sunday night.

He got as far Acme and there he had to abandon his car and come home on foot.

NEW WHEAT POOL CONTRACTS

The Alberta Wheat Pool has not issued any new contracts. A report that these new contracts had been issued is erroneous. Members of the Wheat Pool will receive these in due course, but in the meantime are advised not to pay any attention to rumors regarding this matter. The new contracts will be for a period of five years from the date of the expiration of the present contract. Present Pool members will not be charged any fee for signing the new contracts if signed before August 1928.

The snow storm on Sunday and Monday must have come as a shock to the newly arrived birds and the early blooming flowers. We were living in two entirely different climates during those two days. On Saturday the weather was warm and bright and the minimum temperature was 56 degrees and not a cloud in the sky. Monday morning the ground was covered with snow, which had drifted to a depth of three feet in some places, and that night the thermometer registered

Swalwell

Seeding which would have been general this week in this district, received a set back by the storm which raged over the week end.

The service in the Union church on Sunday morning, which was conducted by the pastor, Mr. F. J. Johnstone, was of a special Easter character. There was a crowded congregation. An anthem "The Redemption" was rendered by the choir, with Mrs. Tilley at the piano. Mr. H. Longstaff was the soloist. The floral arrangements were in the hands of the members of the C.G.I.T.

Miss O'Brien returned on Tuesday to take up her duties at New Hope school after the Easter holiday which she spent in Calgary.

Miss Bernice Patterson and Mr. Alt Tricker returned to spend the Easter at home with their parents.

Service will be held in the Union church on Sunday morning at 11 o'clock with Mr. Johnstone as pastor.

ten below zero. The farmers were practically all expecting to get on the land the first of the week, but they will be delayed another few days until the snow melts and the land dries out.

Too Late!

With the memory of the theatre holocaust, in which some scores of little children were the victims, still fresh in their minds, the citizens of Montreal are passing through another tragedy, an epidemic of typhoid fever which, at the time of writing, has afflicted over 1,500 people and resulted in over forty deaths.

The taking of proper precautions and the provision of necessary safeguards would have saved the people of Montreal from the horrors of the theatre fire, and in like manner, the present typhoid epidemic could easily have been prevented.

It is the same old story over and over again of locking the stable door after the horse has been stolen, and one is sometimes inclined to question whether human beings are, after all, so much superior in intelligence to animals. In the case of animals it is noticeable that once bitten they are twice shy, but humans go on repeating the same blunder time after time and pay large penalties in sorrow, suffering and loss.

Following the Montreal theatre fire an investigation was made into every theatre and hall of public assembly in the city to ascertain whether they were in a condition safeguarding the lives of those attending them. Practically all of them were found deficient in some respects; some were condemned and closed up. It should not have required a great catastrophe and the loss of many lives to lead civic officials to discharge a duty which should be meeting their attention all the time.

And now, when it is too late, investigation has established that the typhoid outbreak is the result of impure milk supplied to citizens. One man kills another and he has to face a trial for murder or manslaughter. In Montreal one thousand and more are lying on sick beds in homes and hospitals fighting for life, and more than two score are dead, all the result of criminal negligence.

In the case of this typhoid outbreak there is double neglect on the part of the health authorities. In the first place it was their sworn duty to safeguard the health of all citizens through the assurance of a supply of pure milk. That is one of the duties of a civic health department, and for the discharge of which they are paid salaries out of the taxes of the ratepayers. In the second place, medical science has placed in their hands the means of preventing typhoid, of rendering people immune from its ravages. Now that the epidemic is raging energetic steps are being taken to inoculate tens of thousands of citizens, when, in the case of many, it is everlastingly too late.

Not only so, but these emergency measures cost many times as much in effort and money as the day to day carrying on of this all important work would cost in the regular work of health administration. Why is it that municipal councils insist they cannot afford to expend money to protect the health and lives of their people, and then expend many times the required amount in a frantic endeavor to overcome the evil which through their shortsightedness has resulted?

And let not other places adopt a "holier than thou" attitude toward Montreal, rather let them examine their own municipal lion holds. It is a well established fact that smallpox, diphtheria and typhoid fever can be absolutely prevented and banished from our midst. These frightful diseases can be considered as extinct as the dodo, leprosy or yellow fever. Yet they continue to stalk through the land claiming their thousands of victims every year. Why? Because of what amounts to criminal negligence on the part of health officials and people generally.

Our Western prairie provinces pride themselves in their work in the promotion of health, but they still have a long way to travel in the direction of the eradication of preventable diseases. There is much educational work yet to be done, and it is sincerely to be hoped that provincial health departments, municipal councils and health officers, all doctors, and every organization interested in the health, happiness and well-being of the people will throw themselves unreservedly into the campaigns now in progress at this point under the "Seagull Plan" for the wiping out of preventable diseases. The community which does not engage in this warfare stands forth as hopelessly backward, and indifferent to the best interests and highest welfare of its people.

A good wife understands a couple. A student is to be congratulated if he can find his way to the top of the mountain. A student is to be congratulated if he can find his way to the top of the mountain.

CHILDREN CRY FOR

**Fletcher's
CASTORIA**

MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Wm. H. Fletcher*. Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

Canada's Certain Destiny

Viscount Willingdon Says Dominion to be One of the Great Nationalities of the World

Canada's certain destiny is to be one of the great nationalities of the world, a member of the British Commonwealth of Nations, but free and independent in its administrative life, Viscount Willingdon declared in an address before the Canadian Club at Victoria.

The Governor General outlined his vision of the Empire, "an empire the like of which the world has never seen, an empire which, whatever possibilities may be, it is my firm belief that the more independent and free the various parts become in matters of administration the closer will be the ties of loyalty that bind them to the throne."

Britain, he said, is still full of life and vigor despite the troubles of post-war years.

Stomach Cramps Yield to "Nerviline"

When doubled up at midnight with cramps you don't feel like experimenting; what you want is something to relieve the cramp. Nothing acts so effectively as Nerviline. Take twenty drops in a little sweetened water, and quick as wink the cramp is gone. Nerviline is about five times as strong as most medicines, and because so strong, only a small dose is required to give instant effect. For stomach, gas, fermentation, cramps, etc., Nerviline should be kept in every home. For sure protection, get "Nerviline" today. 35c at dealers.

Found Millions But Received No Reward

British Officer Left Sick Bed to Locate Wreck of 'Laurentic'

No Admiralty recognition has come to Commander Geoffrey Unsworth, D.S.O., D.S.C., R.N.R., who located the "Laurentic," from which \$25,000,000 in bullion has been salvaged. Commander Unsworth, who is now in charge of a steamer trading between Grimsby and the Continent, was a pilot in Irish waters and mine clearance officer of the Lough Swilly flotilla when the "Laurentic" struck.

He saved the ship's complement, but suffered so much from exposure that he was admitted to Londonderry Hospital. Admiralty expeditions failing to locate the treasure-laden vessel, Commander Unsworth insisted on leaving his sick bed to take part in the search. His knowledge of Irish waters enabled him to discover the wreck and buoy the spot, making possible the recent salvage operations, for which honors and reward have been generously bestowed.

The Admiralty apparently regard the commander's part as all in the day's work, for so far it has gone without recognition.

Externally or internally, it is Good. When applied externally, by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve obstructions of the bronchial tubes and respiratory organs. Try it and be convinced.

Documents Are Guarded In Westminster Abbey

Some Historical Papers Dated Back to Eighth Century

The Muniment Room at Westminster Abbey contains a collection of historical documents that probably has no counterpart the world over. Closely guarded and locked, from bound chests, the papers kept there number over 100,000, and some of them date back to the eighth century. These documents are now being prepared and edited for publication, and Dr. Scott, the librarian of the British Museum, is making a careful record of 57,000 of the more important.

To have children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Anybody who has a face like a fish is reverting to type, if Dr. W. K. Gregory, Trinity College, Hartford, is right. He traces the evolution of the human race from that of a fish in ten stages requiring 200,000,000 years.

Many Vessels Wrecked

Ships Lost During Year 1926 Totalled Three Hundred

A total of 291 vessels were lost in the world during 1926 by disaster at sea or on waterways.

The Bureau of Navigation has just made public its annual compilation on the subject, showing that 2,014 passengers were voyaging on the wrecked boats, of whom 175 lost their lives.

Among the vessels were 24 private yachts, the balance, 267, being merchant vessels or passenger ships.

British Doctors Urge

International Code

Would Remove Language Difficulties in Wireless Consultations at Sea

An international medical code whereby remedies for diseases would be transmitted by standardized code signals in the case of wireless medical consultations at sea between doctorless ships and those carrying doctors, is being urged by British physicians. By this means the difficulties of language differences are to be removed.

Proved safe by millions and prescribed by physicians for

Newsprint From Wheat Straw May Compete With Wood As New Process Is Developed

What material may be expected to supplement wood in the event of the world consumption of newsprint attaining anything resembling the per capita use of this commodity in the United States, asks the Natural Resources Intelligence Service, Department of the Interior, Ottawa. Will it be esparto grass which has been used extensively in the past and is still being used? Will it be bamboo, which has been used to some extent? Or will it be straw? If the latter then Canada with its vast cereal-growing areas possesses great and permanent potential supplies. Straw material is looked upon as having great possibilities and recently a company was formed at Edmonton for the purpose of manufacturing paper from this commodity. If this mill succeeds it would justify a considerable and possibly a remarkable industrial development in the Canadian wheat fields.

Recent developments along similar lines in Italy may be of interest to Canadian agriculturists and capitalists, points out the Natural Resources Service. The problems of producing a straw which will fulfill all the technical requirements of satisfactory newsprint paper has been the subject of intense research on the part of Italian industrial chemists for a number of years. The problem is now thought successfully solved and straw pulp is being produced on an industrial scale in the plants of the Società Elettrochimica Pomilio in Naples and in those of the Società Italiana di Elettrochimica at Bussi. The latter mill which has a daily productive capacity of 20 tons, is now turning out approximately 10 tons of pulp a day for the paper industry. The Pomilio process has the further advantage of utilizing the chlorine by-product in the production of electrolytic soda, which is a well developed Italian industry.

The problem of production costs has also been successfully solved, and the cost of production of newsprint paper containing approximately 80 per cent. straw is claimed to be about 22 per cent. less than ordinary newsprint paper, whose current price is about \$75 a short ton.

Experiments have found paper with an 80 per cent straw and 20 per cent. wood content suitable for printing purposes. Samples of the editions received show the paper to be of good quality and excellent color, but somewhat harder in finish and less absorbent to ink than the newsprint in general use in the United States and Canada. The paper is also slightly less opaque, and the printed sheet does not appear to have the clearness characteristic of American newspapers.

Meanwhile Canada maintains her position of the world leading country in the exports of both wood pulp and wheat, and her pulpwood and cereal-growing resources are so outstanding as to justify the opinion that she will remain the predominant factor in newsprint supplies no matter whether the final honors go either to spruce or to wheat straw.

Sprouting Potatoes

This Method Results in Forwarding the Crop About Seven Days

Tests at the Invermere, B.C., experimental station indicate that potatoes can profitably be planted at any time between May 1st and June 15. After the latter date the result is poor. It was also proven that sprouting forwarded the crop seven days. Early Northern sprouted planted May 15 was ready August 3rd, non-sprouted planted the same date was ready August 10. The yield of sprouted was 22½ tons per acre and of non-sprouted 20½ tons. With Wec Macgregor the result as regards time of readiness were the same, but the non-sprouted yielded slightly better, the record being sprouted 27½ tons, non-sprouted 28½ tons. Sprouting was effected by placing the tubers in a warm dimly lighted building three weeks prior to planting. Strong sturdy shoots about half an inch long were the result.

An envelope is like a woman; it can't go anywhere without address.

W. N. E. 1675

Alaskan Reindeer

More Than Half a Million Roaming the Northern Tundra

Reindeer, originally introduced into Northern Alaska to ward off starvation of the Eskimo, today presents a problem which is commanding serious attention of Government officials and private citizens alike.

The herd of 1,200 imported into the territory in the 10 years prior to 1902, has multiplied so rapidly that it is estimated that more than half a million are roaming the northern tundra. On the present basis of increase, within 10 years, it is expected the number will approximate 5,000,000, the maximum that can be grazed successfully, say Government experts.

The problem of what to do with the fast multiplying herds is one for which no satisfactory solution has yet been found. Marketing the meat in the United States has been undertaken, but difficulty has been encountered in popularizing it as a food. Not that it is less palatable than beef or other meat, those interested assert, but the housewives are slow to try a hitherto unknown commodity.

A School For Freed Slaves

Abyssinia has been much blamed for her backwardness in fulfilling her promise to abolish slavery within her borders. There is news, however, that she has at least made a beginning. Through the British Foreign Office her Regent, Haile Selassie, has secured the help of the Anti-Slavery Society in setting up a school in the Abyssinian capital for poor children and freed slaves.

A Smart Daytime or Evening Frock

Charmingly youthful is this chic frock having shirred side sections, thereby adding grace. View A shows the frock suitable for daytime wear, with the cuffs finishing the long dart-fitted sleeves and shaped collar simply bound. View B has the neck cut to a V in front and a lace vestee added, and the sleeves omitted. A note of contrasting color may be introduced by the flowers placed at the right shoulder and left hip, making this a particularly attractive frock for evening wear. No. 1546 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3 yards 39-inch material, or 2½ yards 54-inch. View B requires 1 yard 3½-inch lace for vestee. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Time Ball No Longer Needed

Greenwich Time is Now Picked Up by Wireless

For two generations the Signal Tower at Deal has given the time of day to passing ships by the dropping of its Time Ball. Now the tower is to be closed and the ball will drop no more.

No one seems to know the tower's age, but in the old days it was used for semaphore and flag signalling to the ships lying in the roads between the shore and the Goodwin Sands. It was the last of a chain of signalling stations from the Admiralty in Whitehall.

With the coming of the telegraph the chain was no longer needed, and about 1862 the tower was put to a new use. It must have seemed a marvelous thing then that an electric current from Greenwich could release this huge ball, a hollow size drum six feet across, at the very moment the clocks of London were striking one. Outgoing ships must have found it invaluable for setting their chronometers.

Now, in the Wireless Age, it seems less startling to us that Greenwich time can be picked up anywhere. Wireless has put the Time Ball out of business, and the Signalling Tower is pensioned off, its work done.

The Time Ball was raised by a wheel worked by hand a few minutes before the hour, and when the electric current released it its fall was broken by compressed air, a rubber cushion, and six strong spiral springs. All that has now been done for the last time, for the ball ceased to work recently.

Discover Colossal Statue

Part of a colossal statue, believed to be of a Roman emperor has been discovered at Eleusis, near Athens. Only the head and bust have been uncovered. The statue is of great beauty. According to the size of the head and bust, which have a total height of more than two and a half yards, the whole statue is about five and a half yards high.

It has been claimed that 2,000 tons of dust per square mile were recently deposited in the vicinity of Laramie, Wyoming.

Canada Holds Leading Place As Best Country in World For Raising of Domestic Fowl

First Dominion Day

Events of 1867 Are Recalled by Toronto Cab Driver

While preparations are going forward to make the celebration of Canada's 60th birthday, next July 1, a memorable event, 81-year-old Charles Abbott, probably Toronto's oldest cab driver, recalls the doing of the first Dominion Day—1867.

On that momentous day Mr. Abbott's cab had been engaged by Alderman John Carr, chairman of the Toronto Fireworks Committee. Mr. Abbott still retains vivid recollections of the modest fireworks display in Queen's Park that closed Dominion Day.

A feature of Toronto's celebration of the first Dominion Day, Mr. Abbott recalls, was the military review of the Royal Artillery and Body Guard.

A Mechanical Thinker

French Inventor Solves Troubles of the Busy Executive

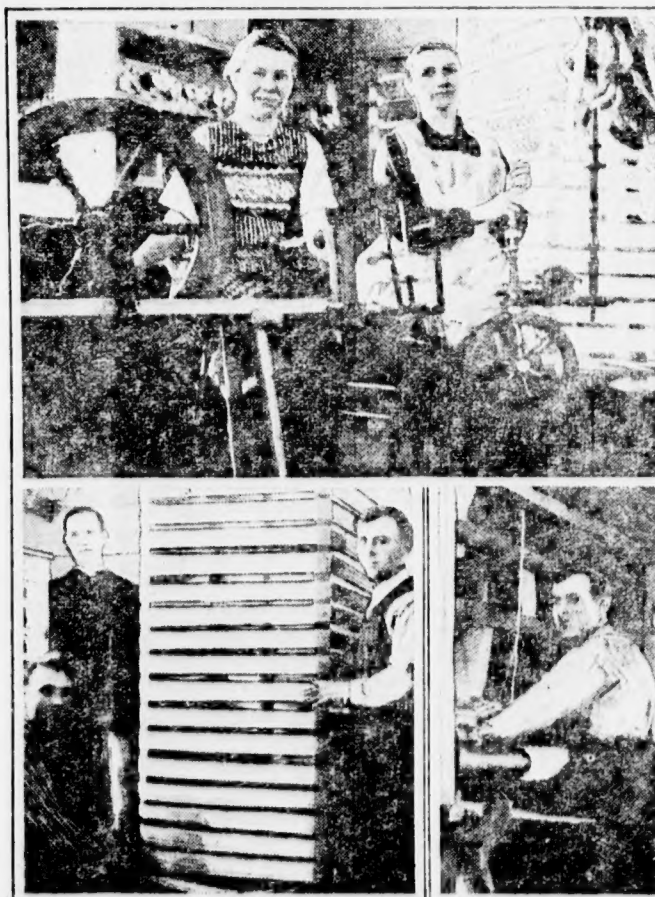

A mechanical thinker to remind office executives of their appointments and tasks, has been invented in France.

It stands on the business man's desk. As he makes a memorandum of an order, appointment or idea to be executed at a certain time he throws back a lever on the machine, to indicate the hour, day and month of the event. When the time comes, even if it is a year later, a light goes on and a bell rings.

The executive looks at the clock in the machine, notes the time it registers, runs down the memorandum sheet to the indicated time and reads his own instructions to himself.

"You must be growing tired of me," said Mr. Newbywed. "You never call me 'dear,' as other men's wives do." "Do they?" she demanded suspiciously.

Old Trade Flourishes in New Land

An old trade flourishes in a new land. Hand loom weaving has been successfully introduced at Denzil, a small Saskatchewan town along the lines of the Canadian Pacific Railway. The keen enthusiasm in hand loom weaving at Denzil, and the general interest throughout Saskatchewan can be traced to the energy of Rev. Father John Schultz, and comes as the result of his recent visit to Great Britain, France, Germany, Belgium, Switzerland and Italy. He investigated hand weaving in each country, studied the art himself, and on his return installed the looms.

Father Schultz believes that the industry will foster home life in the rural districts, and will particularly encourage new settlers by providing them with a touch of the daily routine to which they were accustomed prior to their arrival in this country. Weaving is regarded as the nucleus around which other farm activities will prosper. This activity creates a demand for sheep raising, and hemp and flax growing. Another feature, and one highly regarded, is that weaving may be undertaken by members of farm families unable to carry on with the heavier duties of rural life.

Why is Canada the best country in the world in which to raise domestic fowl of all kinds? This is the question that many thousands of people, who do not live in the Dominion, are asking themselves. They have been led to propound this query because of the magnificent display of birds made by Canada at the World's Poultry Congress in Spain in 1924, and also because of the fact that Canada holds the world's egg-production record, both for a pen of ten hens and for an individual hen. As a consequence they will gather in Ottawa for the third World's Poultry Congress from July 27 to August 4, 1925.

A good many Canadians may feel that because they do not know and breed of poultry from another they have no interest in this gathering, but, if so, they miss both its national and personal significance. In Europe, particularly in Great Britain, the advancement in poultry breeding is largely due to the personal and financial assistance given by leading citizens. His Majesty King George and the Prince of Wales (both of whom will have exhibits at Ottawa) are amongst the outstanding poultry breeders in the Empire, and their example is followed by hundreds whose purpose is patriotic and philanthropic—persons who are interested in birds because they are more keenly interested in men. It is expected that the Congress in Ottawa will be attended by about seven thousand delegates from outside Canada, hundreds of whom come with the idea of seeing whether a country which produces such fine poultry would not be a good place for men and women from the over-crowded agricultural areas of Europe. The more citizens from different parts of Canada there are at the Congress the more likely the outside delegates will be to learn something of the different provinces and to take back with them an adequate conception of what the Dominion has to offer.

The Congress will include also many scientists of international reputation in biology, genetics, pathology, zoology, etc., from all the countries of Europe. There will be a large number of British agricultural county agents, and the representatives of the great importing houses of Western Europe. These will be to speak, in addition to the world's great experts in all lines of poultry breeding and in the production and marketing of poultry (live and dead), eggs, equipment and supplies. There will, therefore, be very much to interest all patriotic Canadians, whether their profession or business.

Representatives of thirty different countries will attend, and there will be one of the greatest displays of poultry ever assembled, in which it is believed Canada's part will not be insignificant. The delegates will be welcomed by His Excellency the Governor-General, and by the Prime Minister, The Minister of Agriculture, the ministers of agriculture of the various provinces, and other prominent citizens are on the congress committee, which has all the details in charge.

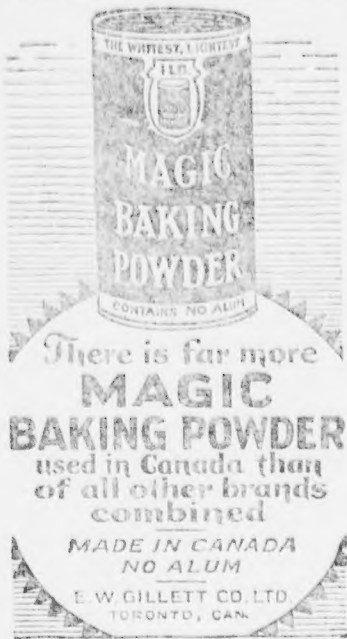

The congress officers are: President, Mr. Edward Brown, London, England; director, Mr. F. C. Clifford, Dominion Poultry Husbandman; secretary, Mr. Ernest Rhoades, Transportation Building, Ottawa.

Value of Prairie Crops

In 1925 Exceeded World's Gold Output by 270 Million Dollars

The prairie provinces of Canada are richer in their output of wheat and other crops than all the gold mines of the world, according to the National Resources Intelligence Service, of the Department of the Interior, Ottawa, the value of these crops exceeding the total gold output by 270 million dollars. The field crops of the three mid-western provinces were valued at 650 million dollars (1925), while the world's gold output was but 380 million dollars.

Split infinitives have been venerated by a noted grammarian, George Oliver Curme, Northwestern University professor. He says the divided verb form has been used for centuries by the best writers.

Women, Here are Facts!

Mrs. Walter Coles

Woodstock, Ont. — "I have been greatly benefited by taking Dr. Pierce's Favorite Prescription and do not hesitate to recommend it as a woman's tonic and nerve. I was all run down, weak and nervous, had a druggist, worn-out feeling. I took the 'Prescription' and found it very helpful. It built me up in health and strength and made me feel so well that I would take it again if I were ever in need of a tonic and nerve medicine, for I was very well satisfied with the way it helped me." — Mrs. Walter Coles, 553 Huron St.

All druggists, Tablets or Liquid.

Send 10 cents to Dr. Pierce's Laboratory, Bridgeport, Ont., if you wish a trial package of tablets.

**Will Attempt Flight
Over Mount Everest**

Airman Holding French Height Record Will Use Special Plane

Jean Colliex, the French aviator who holds the French height record at 11,811 feet, made in France last August, has sailed for India with a special aeroplane to attempt to fly over Mount Everest.

Mr. Colliex has obtained the permission of the British Indian authorities to fly over the mountain and the mountains of the British air station. He has promised to fly with him to the top of the mountain to show that the world's highest mountain is within reach, 29,000 feet over the Indian land.

Mr. Colliex is taking with him a cinematograph and will make a special effort to obtain photographs of the mountain and the surrounding area which will serve as a guide for any future attempt to reach the summit on foot. He expects to make the flight about the end of May or the beginning of June.

**BABY'S HEALTH
IN THE SPRING**

Can Best be Guarded With Baby's Own Tablets

The Spring is a time of anxiety to mothers who have little ones in the home. Conditions make it necessary to keep the baby healthy. He is often confined to overworked, badly ventilated rooms and catches colds which with his whole system. To guard against this, a box of Baby's Own Tablets should be kept in the home. To keep the baby healthy and to keep his mother healthy, this will prevent colds, constipation or colic and keep baby well. The Tablets are sold by most druggists or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Innovation At Prague Fair

Peppercorn Was Something Entirely New To Czechoslovakians

Peppercorn popped over glowing wood coals drenched with melted butter and served hot to astonished Czechoslovakians was the central feature of the Spring Sample Fair.

Peppercorn has never before been seen in this country. The peppercorn is superintended by Robert Baldwin, American commercial agent, who also introduced at the fair exhibit — in numerous other novel products — among which are listed a folding bed, automatic self-stirring, novel auto mobile parts, road mowers and a tin can, and one half horsepower motor which a child can start.

Goods from all European countries are shown at this exposition.

Holloway's Corn Remover takes the corn out by the roots. It is it and gone.

Received Special Training

Model Farm Men From British Isles Come to Canada

Among immigrants landing at Halifax recently were 114 sheep men who had been trained on a model farm in the British Isles to prepare them for agricultural life in Canada.

Each of the men had been given two pounds to see them through the first few days in the Dominion. It was discovered, however, that the newcomers had about the money because of the authorities. The sheep men were asked when the British Government added the necessary funds to make up the shortage, it means the money will be given to the immigrants when they land.

**Could Not Sleep
Heart and Nerves
Were So Bad**

Mr. Geo. Meek, Windsor, Ont., writes: "I suffered with my heart and nerves and could not sleep at night for months in my head. I managed to keep at my work somehow, until I began to have dizzy spells which got so bad I could not go to my work. I was afraid to go out any place, for very often I would stagger on my feet, and everything in front of me would turn black and fade away. While I was home sick a friend told me to take I got four boxes and by the time I had used them the pains and noises in my head ceased and I was able to get a good night's rest. Although that was six years ago I have never been troubled with that complaint again."

Price 50c. a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

"That Mrs. Reed is much older than I thought."

"What makes you think so?"

"Well, I asked her if she had read 'Acrop's Fables,' and she said she read them when they first came out."

— Loud speaker. "Bang! Crash! Help! Murder! Police! Run!"

— Radio Fan. "Hokey! I've got Chicago!"

**When You Tint
Use Real Dyes!**

When tinting delicate underwear, silk stockings, or any fine fabrics use **real dyes**. That's the only way you can get the same beautiful, soft shades materials have when new.

Tint some pieces tonight, with real Diamond dye—you'll see the difference! No one will dream they were tinted at home. And you can do real dyeing with just as perfect results, if you will just use the true Diamond dyes.

FREE: why not ask your druggist for the very useful Diamond Dye Encyclopedia? Valuable suggestions, easy directions, and piece-goods sample colors. Or write for free copy of Color Craft, a big illustrated book sent postpaid—address: **DIAMOND DYES**, Dept. N13, Windsor, Ontario.

Make it NEW for 15 cts!

You Must Have Strength Endurance and Courage

Mr. W. B. Towner, New York, writes: "Never have I felt better in my life than since taking CARTER'S LITTLE LIVER PILLS. I find they keep my bowels active; headaches and indigestion never bother me now. I enjoy my sleep and get up refreshed, ready for a hard day's work."

Millions all over the world have found this doctor's prescription a relief for every day ailments. CARTER'S LITTLE LIVER PILLS, the purely vegetable laxative, are small, easy to swallow and move the bowels in a gentle manner free from pain. They are not habit forming and do not contain Calomel, Mercury or poisonous drugs. CARTER'S LITTLE LIVER PILLS in red packages, 25c. and 75c. Try them to night. Tomorrow refreshed—All druggists.

SUNDAY SCHOOL LESSON

PETER'S LESSON IN TRUST

Golden Text: Be of good cheer; it is I, he not afraid.—Matthew 11:27.

Lesson: Matthew 11:22-33.

Devotional Reading: Psalm 91:1-10.

Explanations and Comments

1. Peter Sees the Power of Jesus, Verses 22-27. After the feeding of the Five Thousand the disciples sympathized with the desire of the multitude to make Jesus King, and were loath to leave the spot until he could attend them. He bade them enter the boat and cross to the other side of the Sea of Galilee while he remained behind to dispose of the crowd. When the crowd had departed, Jesus went up the mountain to pray. John tells us that Jesus, perceiving that they were about to come and take him by force to make him King, withdrew again into the mountain himself alone (John 6:12).

Jesus was not always going about doing good. He could not; no man can. There comes a time when the doing is worthless and fruitless. No, Jesus was often away getting power, getting strength and the valor which enabled him and inspired him to do good. Sometimes he went away from the multitude, sometimes he went away from the multitude. He went, of course, in order to return. But he went, that is the point. He left the plain that in the mountain the drained powers might be renewed and recharged for use in refreshing the plain again." — Alexander McGuffin.

"I watch the Master take His way far up the mount, at break of day, 'Mid nature's solitude to pray; And as I seem to see Him there I hear, with all my soul of care, 'He calls thee to the mount of prayer.'"

— John R. Clements.

And when even was come, He was alone.

"When God speaks he likes no other voice to break the stillness but His own, hence the place that has always been given to solitude in all true religious life. It can be overdone, but it can be grossly underdone. And there is no lesson more worth insisting on in days like ours than this: when God wants to speak to a man He wants that man to be alone." — Henry Drummond.

For daterper — Minard's Liniment.

The Increasing U.S. Population

Population Increases About 13,000,000 in Seven Year Period

On July 1 next it is the estimate of the census bureau that the population of the United States will be 118,628,000. This will represent an increase over the 1920 census returns of a trifle short of 13,000,000. Next July 1 will be just three quarters of the current decade, and if the same rate of increase be assumed for the last quarter, the census of 1930 should register a population of 123,500,000 with an increase since 1920 of 17,250,000. It will be greater by 3,500,000 than the gain in population between 1910 and 1920 in face of a declining birthrate and the sharp curtailment of immigration. As an offset to these two factors is the decline in mortality statistics.

Best Seller in China

The Bible is still the best seller in China notwithstanding the spread of the power of the Nationalists, who are on friendly terms with Russian bolsheviks. The British and Foreign Bible Society sold more than four million Bibles in China last year.

The Maoris of New Zealand during the last 60 years have emerged from cannibalism to a civilization equalling that of the white man.

When a man falls into an error he is likely to be more or less injured in his descent.

Dodd's Kidney Pills Have Relieved Thousands of Canadian Women Sufferers

Saskatchewan Woman Advises All Kidney Sufferers to Use Dodd's Kidney Pills.

Henribourg, Sask. (Special) — "I must say that the use of Dodd's Kidney Pills have done me much good," writes Mrs. T. S. Reeves, who lives at this place. "I also got some Dodd's Kidney Pills and sent to a sister-in-law of mine who was unable to get them. She also found a great relief after having suffered with backache for a long time."

It is statements like this that have built up and maintained the reputation Dodd's Kidney Pills hold today, as the old Canadian Kidney remedy.

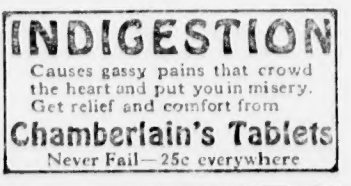

Dodd's Kidney Pills have become a family remedy all over the Province because people have tried them and found them good. They are purely and simply a Kidney remedy. They help Rheumatism, Lumbago, Lame Back, Heart Disease and urinary troubles because all of these are either kidney disease, or are caused by the kidneys failing to do their work.

Obtained from all druggists, or The Dodd's Medicine Co., Ltd., Toronto.

A train of thought should not be allowed to run wild.

Makes Breathing Easy. The construction of the air passages and the struggle for breath, for familiar evidence of asthmatic trouble, cannot doubt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is a untried, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

When a man is unable to choose between two evils he usually hunts up a third.

FOREIGNERS ARE FLEEING FROM INTERIOR CHINA

Shanghai.—With another general strike in the offing and with Shanghai the centre of a continued flight of foreigners from the interior, the defence authorities have made further preparations to protect the international settlement.

A barbed wire barrier now is being constructed along the entire length of the Avenue Edward-VII, between the French concession and the international settlement. The Suffolk Regiment also was assigned to guard the offices of the cable companies situated in the Avenue.

The date of the new general strike, which has been decided upon by the general labor union, will be fixed later. There are about 20,000 mixed-lance workers still out from the last strike.

Meanwhile the Japanese naval authorities warned the Chinese that the Japanese navy will heretofore take drastic steps in the event of unlawful actions by Nationalist soldiers or in the event of firing on Japanese steamers without good cause.

Reports continue of firing on foreign vessels in the Yangtze by Nationalist soldiers on either side of the river. Two British steamers leaving Hankow, which has again become the centre of anti-Japanese activities, were fired on. The American destroyer, John D. Ford, which recently came here from Manila, was fired on between Shanghai and Nanking. The destroyer brought its four inch gun and machine guns into action in reply.

Disquieting reports have been coming from Hankow, scene of anti-Japanese disorders some time ago. An alien from a Japanese source in that city said that soldiers in civilian clothes, rations and labor pickets were overrunning the city and that the Japanese women and children there will embark on the first available steamer.

Although the great majority of missionaries in the interior of China are now on route for Shanghai, or planning to start soon, about 100 are refusing to leave their posts in the Yangtze Valley, despite the edicts of authorities.

Increase In Taxable Value of Property

Statistics Show Figures Higher for Period From 1919 to 1925

Ottawa.—An increase of \$1,302,772, 886 in the total taxable value of real property in Canada is shown for the year 1925 as compared with 1919, according to a report issued by the Dominion Bureau of Statistics.

The total value of taxable property in the Dominion was \$7,331,785,535 in the year under review as against \$6,028,912,619 in 1919.

Personal property, which is only taxed in certain provinces, increased from \$52,939,719 in 1919 to \$56,152,131 in 1925.

Thrown Out

Lower Duty on Livestock

Western Stock Growers Are Asking For Relief

Calgary.—Urging the Dominion to take all available measures to obtain relief from United States duty on livestock entering that country, the Western Stock Growers' Association addressed a resolution to the Federal Government. Another resolution pointed out the necessity for keeping grain and screenings in Canada and prohibiting export of this commodity to the United States. A petition will be submitted to railways asking reduction of rates on horses to an equality with cattle. The Alberta Government was asked for an appropriation for experiments with grazing rotation and rehabilitation of native grasses. Dr. S. E. Talmie told the convention that farmers are "losing ten million dollars a year marketing beef of poor quality," and urged establishment of beef grading to better this condition.

Attained Terrific Speed

Major Segrave Drives Car 203 Miles Per Hour

New York.—Major Segrave's record of 203.7208 miles an hour at Dayton Beach marked the nearest approach to the highest speed man has attained, 278 miles an hour, in an airplane. This air record was set by Flight Lt. Bennett, of France, in December, 1921. The fastest motor car, built by that set by an engine in a dive with run from Fleming to Jacksonville, Fla., in 1901, by attaining an average of 129 miles an hour.

On the water, Miss Bennett, in 1920, in Lake George set a record of 77.5 miles an hour for speed boats, while on the Solent, England, the Maple Leaf II. made 59 miles an hour in 1921.

The record of the Canadian liner, Manicouba is 27.01 knots, while that of the Leviathan is 28.01.

Pensions Act

No Further Amendments to be Made to the Present Act

Ottawa.—"The Government does not intend to extend the present provisions of the pension act by further amendments this year," stated Hon. J. H. King, Minister of Health and Soldiers' Civil Re-establishment, in the House.

The present pension legislation said Dr. King provides pensions for all disabilities "attributed to or incurred during military service," and for "disabilities resulting from injury or disease or the aggravation thereof incurred during military service." No ex-soldier who was so disabled was denied a pension, but responsibility could not be accepted for those whose disability were not related to war service.

British Will Protect Colony of Hong Kong

Have No Intention of Diminishing Rights or Authority
Hong Kong.—The British government will give full protection to the colony of Hong Kong and the leased territories on the mainland during the civil warfare in China, according to assurances given by the local secretary of state.

The secretary's communication said the government has no intention of surrendering Hong Kong or abandoning rights or authority in any part of the territories under its administration.

Leaving For Australia

Ottawa.—Hon. Ernest Lapointe, Minister of Justice, leaves Thursday night for Vancouver where he will embark for Australia on April 6. Mr. Lapointe will represent Canada at the opening of the Australian Parliament buildings at Canberra on May the 9th.

Is Made An Indian Chief

Victoria, B.C.—His Excellency Lord Willingdon, Governor General of Canada, is now Chief Gofushun, or Chief Rainbow, of the Vancouver Island Indian tribes, having been initiated here in one of the most picturesque and colorful ceremonies ever witnessed in this city.

Talbot, Eschonta, has just opened its broadcasting station, and the radio club there already has 500 members.

AMENDMENTS TO GRAIN ACT ARE BEFORE HOUSE

Ottawa.—Amendments to the Canadian Grain Act, proposed by the board of grain commissioners, were tabled in the House of Commons, along with correspondence between the Minister of Trade and Commerce and the board.

On February 5, the minister wrote to the commission asking for suggested amendments. On February 7, Louis H. Day, chief commissioner, replied, setting forth the proposals. He stated that the board held the provisions of the drafted amendments would give the farmer the same privileges as "the Campbell mill," which was before the Commons last session. The commissioner's proposals, however, defined the conditions under which grain might be delivered to a country point if the farmer desired to take delivery of the grain and ship it to any specific elevator or point.

The drafted amendments covered the duties of country elevators. While the present grain act limits facilities as to weights and grades, the commission's proposal covers these two important points, and gives the farmer power to make regulations covering the method of weighing samples. The board, too, could investigate disputes regarding grades and weights. In his letter, Mr. Day stated that he believed the proposals to be fair and reasonable to all parties.

Spanish-South American Air Service Planned

Will be Started if German Government Finances Completion of Airship

Berlin.—Airship service between Spain and South America, starting within 18 months, is projected by Hugo Eckener, Zeppelin expert, provided the German government furnishes the remaining 2,000,000 marks necessary for the completion of the airship to be used, which is being built in Germany.

Similar agreements are expected to be negotiated with the Argentine and other South American governments. It is planned at first to make a round trip to South America every three weeks, carrying a light cargo consisting mostly of mails but including some passengers. It is estimated that the flight to South America will require from 75 to 80 hours.

Gain in Employment

Ottawa.—There was a moderate gain in employment at the beginning of March, the upward movement being rather more extensive than in earlier years recorded. The largest increases took place in manufacturing and construction, while logging, mining and trade were seasonally slack.

Matter of Defence Left With Government

Canada Not Bound in Any Way Says Premier King

Ottawa.—In no way has the Parliament of Canada been bound by decisions made by the Imperial Conference, last fall," declared Premier W. L. Mackenzie King, in the House of Commons, when he reviewed the reports accepted at the Conference in London. Referring to the question of defence, Premier King declared that no commitments had been made on behalf of Canada with respect to defence, and no request had been made on behalf of the British government in the matter. It was for each Dominion, through its own government and parliament, to decide.

"It is for this Parliament to say to what extent Canada will take in all matters pertaining to defence," said the Premier.

Manitoba Liberal Leader

Judge Hugh A. Robson Elected to Succeed Hon. T. G. Norris

Winnipeg.—Judge Hugh A. Robson, K.C., prominent in the public life of the West for many years, is the new leader of the provincial Liberal party. He was elected to succeed Hon. T. G. Norris, who resigned his position a year ago, at a party convention held here.

Judge Robson was elected from a slate of several nominees, including Fred C. Hamilton, former president of the provincial Liberal Association. Mr. Norris who is the leader of the Liberal group in the Legislature, was nominated, but withdrew his name.

Judge Robson, who was born in Harrow in Furness, England, in 1871, came to Canada in 1882, and is a former resident of Winnipeg.

Death of Sir Charles Tupper

Was One of Canada's Most Distinguished Elder Statesmen

Vancouver.—Hon. Sir Charles Tupper, K.C.M.G., K.C.L.H., died at his home here following an attack of pneumonia which had confined him to his home for nearly two weeks.

Sir Charles was one of Canada's most distinguished statesmen. He was born in Antwerp, N.S., in 1855 the son of the late Right Hon. Sir Charles Tupper at one time prime minister of the Dominion.

Salt For Dyspepsia

Washington.—Common salt is as effective as any other remedy for dyspepsia, according to reports of research at the University of Melbourne, Australia, recently received here. Dr. M. A. Apperly has found that common salt helps certain types of plain dyspepsia.

Setting Bill Defeated

London.—An attempt to introduce a bill in the House of Commons to legalize betting in England was defeated by a vote of 116 to 41.

THE EQUALITY OF STATUS BINDING BRITISH EMPIRE

Ottawa.—Hon. Ernest Lapointe, Minister of Justice and chairman of the Imperial Conference committee on treaty-making powers, mentioned the House debate on the Imperial Conference. Mr. Lapointe said that the Imperial Conference of 1924 had no authority to change one of the British North America Act, by the constitution of the Empire. When the conference did, Mr. Lapointe explained, was to crystallize the principle of equality of status which was already recognized and which was the logical outcome of the development of the various nations. It was a principle, clear and definite, inherent in that principle. It did not in itself it was as to make it the principle of contribution to the permanency of the free association of the nations of the Empire. It is the hard and unyielding acceptance of the principle of unity and liberty, unity preserved and enshrined in the British Empire and liberty in all dominions and nations and activities in the various nations of the Commonwealth. It is no longer the case of

"A daughter and I in the mother's house."

"But a mother in my own."

"The family is a family of slaves, bound in their rights, and anywhere."

And, concluding his speech, Mr. Lapointe declared, in words of liberal applause, that the principle underlying this pact would change the way to peace, progress and nations' good.

Many Claimants to Millions

Dutch Merchant's Fortune Has Drawn Interest for 200 Years

Adelaide, Australia.—A fortune of \$500,000,000 which has been accruing at interest for 200 years, is to be subject of issue in the courts, according to claims that are now being filed here.

Edward Webber, merchant prince of Holland in the days when the Dutch flag was supreme in the world of commerce, died in New York leaving an immense will, bequeathing an enormous sum to his seventh generation, claimants assert.

The fortune, which has now grown to \$500,000,000, may create at least 150 Australian millionaires for more than that number in the city of Adelaide alone claim a share.

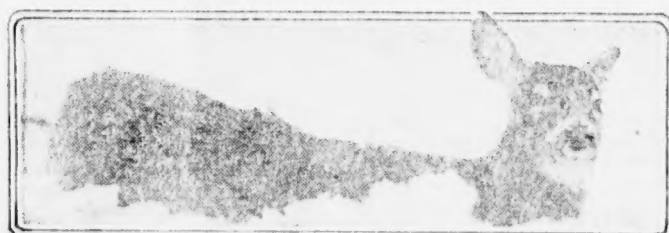

The claimants are calling a meeting to discuss the matter.

Harvesters From Oxford

University Students Plan to Help Canadian Farmers This Year

Oxford.—Oxford University students are planning to help harvest the Canadian wheat crop next summer. Parties of students are being recruited under the joint auspices of the Canadian government and a Canadian railway. They will sail in July for Montreal and will work on Ontario farms until the middle of August, moving on later to Manitoba and returning to England for the reopening of college in October.

Trappers Overtake Swift Deer

Many tales have drifted down from the north of how men have overtaken and captured wolves, deer and other swift-footed inhabitants of the woods of Ontario and Quebec. Readers of such have often been skeptical but the above photograph, taken only a short distance from the Canadian Pacific lines in the Laurentian Mountains, proves that such a thing is possible, in the case of deer at least. Heavy snow, as can be seen, accounts for this and in the pictures above several trappers on snowshoes have succeeded in capturing two animals in question. The deer looking placidly into the camera was no doubt caught only after an exhausting chase through the deep drifts. The little doe that seems to be just an animal for the trapper, will doubtless be admired in a short time by thousands of people in some city park. Trappers in the northern sections of Ontario and Quebec have saved many of these young animals from death by freeing them from heavy drifts of

snow, and thus keeping them from packs of hungry wolves.

While you are enjoying Wrigley's, you are getting benefit as well.

PULL TOGETHER

Pull together, brethren. We are all here for the same purpose. Then live and let live. The best way to build up a town is for each and every man to pull together and not strive to rend and tear down. All the residents of a town are partners not opponents. In all likelihood the more business done by your rival the more you will do. Every merchant who treats his customers honestly and fairly will get his share and the more business that can be secured by united effort, the better it will be for all. When a town ceases to grow it commences to die, and the more people try to kill each other off in business and good name the more rapidly will utter ruin come to all. Stand together for the advancement of every citizen, and if a man shows the ability to prosper do not pull him back with jealousy or weight him down with cold indifference.

Not long since a young man of splendid muscular development was seen in our town with two heads on his shoulder. Both were fully developed heads, with rather handsome features, one with blond hair and the other with black.

The young man is not a museum freak as might be supposed. The other head was the property of his sweet heart, and would not have appeared in such a deformed position had it not been for the young lady's neglect to drop the curtain.

An honor was conferred upon Captain James Turnbull, C.B.E., R.N.R., commander of the Canadian Pacific steamship Montserrat, recently, when he was appointed Aide-de-Camp to His Majesty King George V.

All golfing records were shattered recently when K. Tanaka, local Japanese golfer, playing on the Canadian Pacific course "Lansara," scored a hole in one twice in one round of the eighteen-hole links. The first was obtained at the fifth hole which is 115 yards, and the second at the sixteenth hole which is 210 yards.

During the month of January of the present year automobile production in Canada has increased 98 per cent. over and above the production for the corresponding month of last year, being 15,376 cars, as compared with 7,752 for the previous year. Almost half of the cars produced were for export, according to the Dominion Bureau of Statistics.

In memory of the late Col. George H. Ham, of Montreal, dean of railway publicity men in North America, a beautiful memorial porch is being erected over the door of St. John's Church at Whiteby to the members of the Women's Canadian Press Club. The late Col. Ham died in Montreal on April 16 last.

Naga, Japan. — Eleven passengers on the Round-the-World cruise of the Canadian Pacific flagship Empress of Scotland squeezed through a rectangular hole in a pillar just behind the colossal image of Buddha in the Daibutsu Temple here yesterday, thereby achieving, according to ancient tradition, the short road to Paradise.

The Board of Control at Toronto have formally accepted the offer made by Sir Leicester Harmsworth, English Baronet, of Mounier's portrait of General John Graves Simcoe, after whom the County of Simcoe was named. General Simcoe set up his first government at York, now Toronto. The painting will be hung in the Toronto City Hall, already adorned with a collection of historical paintings recognized as one of the finest of its kind in America.

Here and There

Eleven head of shorthorn stock owned by the Prince of Wales at his ranch near High River, Alberta, were purchased for the Kirkwood Farm in California, according to an announcement made by Prof. W. L. Carlyle, manager of the Prince's ranch.

Canada's largest muskrat ranch is now being established at Swan Lake, about 40 miles west of Quesnel in central British Columbia. There are about 4,000 muskrats on the farm now and it is estimated that the ranch will eventually have an annual output of 50,000 pelts.

The S.S. Emperor of Port McNicol, purchased by the Canadian Pacific Railway Company and renamed the S.S. Nootka, sailed from Montreal recently for Newfoundland and will thence proceed to Vancouver via the Panama Canal to join the Canadian Pacific coastal fleet. The Nootka will be operated on a cargo service between Vancouver and Skagway, Alaska.

Edmonton. — The first plant in Canada, outside of British Columbia, for the freezing of fish, poultry and eggs under the Otteson process, will be operating in this city by June 1st, according to P. Johnson, managing director of the Johnson Fisheries Limited. His firm paid \$10,000 for the rights of the territory. The initial capacity of the plant will be fifteen tons a day.

Victoria. — The new drydock just completed at Esquimalt, Victoria, is the second largest in the world and only 29 feet shorter than the Commonwealth dock at Boston. This giant dock, hewn out of solid rock, cost \$6,000,000 and measures 1,150 feet long, 140 feet wide at the top and 125 at the bottom. Its depth is 49 feet 5 inches with 40 feet of water in the sills at high water. The dock will take the largest ship afloat.

The shipment of Canadian apples to England and to many centres on the Continent is expected to be heavier this year than ever experienced, according to J. R. Martin, manager of the foreign freight department of the Canadian Pacific Express Company. About three years ago the practice of sending Canadian apples to the Old Country as Christmas gifts became popular, and the shipment each year have correspondingly increased.

Facilities at the Eastern Public Cattle Market in Montreal have been augmented by the addition of a new export cattle building, which was opened recently. This new building is considered one of the finest of its kind on the continent and has accommodation for 50 carloads of cattle. By the arrangements of 25 cattle chutes on each side of the main alley-way, a train of 25 cars can be unloaded at each side of the building.

According to the western farmer a feature of the present year's harvest was the use of "combines"—the combine reaper and thresher now being made by several implement manufacturers in this country. One farmer using this outfit claims to have covered from 35 to 50 acres per day at a cost of 45 cents an acre. He says that they save the cost of twine and about nine-tenths of the labor of harvesting. The implements cost about \$2,000.

A preliminary conference, the results of which may be of the utmost importance to the Maritime Provinces, was held in the Board Room of the Canadian Pacific Railway at cently at the invitation of E. W. Beatty, chairman and president of Windsor street station here re the company. It was attended by Hon. E. N. Rhodes, Premier of Nova Scotia; Hon. J. B. M. Baxter, Premier of New Brunswick; Hon. J. D. Stewart, Premier of Prince Edward Island; E. W. Beatty, chairman and president of the Canadian Pacific Railway; A. V. Sale, Governor of the Hudson Bay Company; Colonel Stanley, of the Hudson Bay Overseas Settlement; G. W. Allan, director of the Hudson Bay Company; and Dr. W. J. Black, representing the Canadian National Railways.

Flourishing Immigration Prospects

Pictures 1 + 4.—Typical examples of juvenile type of immigrants to Canada. No. 4 shows 7 children who arrived alone recently. 2. Immigrants crowding the decks for a first glimpse of Canadian shores. 3. Sturdy settlers for the Dominion.

The active immigration season of 1927 that has just opened will see, according to authoritative information given out by the Department of Colonization and Development of the Canadian Pacific Railway, the largest and most effective addition to Canadian population of any similar period since the outbreak of the Great War. In the opinion of authorities it is not unreasonable for the Dominion to expect over 200,000 new citizens, or about 70,000 more than during the year 1926. During this year Canada received 135,984 settlers.

Several factors tend towards this promised increase, of which one of the most potent in the gradual evolution of systems and a development of new machinery that has made the organization well nigh perfect. Further reductions in ocean and rail rates from the British Isles have induced considerable numbers to submit to the examinations for acceptance under the cheap passage. Applications at the rate of several a day are received, it is reported. Already

this year well over 3,000 settlers have been landed in Canada by the Canadian Pacific liners plying between this country and the Motherland. It is interesting to note that about sixty per cent of the applicants are miners and others who have some knowledge of and experience at farm work.

The volume of pertinent inquiries from United States Agriculturists with regard to western Canadian farming prospects, has been much heavier this year than for some years, is the report. This is regarded as a most reliable index to the trend of the movement. A new and significant movement to develop however is that of tobacco growers from North and South Carolina, Virginia and other states to Western Ontario, being attracted by the rosy prospects now facing the Canadian tobacco growing industry.

Though land settlement conditions have drastically changed and the tendency is to place newcomers on vacant lands within reasonable distance of the railways, it was pointed

out that it was a mistake to consider that homesteading is altogether a thing of the past as a factor of western Canadian development. During the year 1926 homestead occupations in the west amounted to an increase of 60 per cent over the occupations for the previous year and accounted for the occupation of nearly a million acres of raw land. This movement in continuing as is evident in the figures of filings in January 1927 which were 32 per cent than those of the same month of the previous year.

The most significant factor today, it was pointed out, is the local colonization board, through which the general interest in immigration and colonization takes practical shape under the direction of the railways. About 150 similar boards now exist in western Canada.

Juvenile immigration, the importance of which is being increasingly realized in recent years, promises to be very heavy during the year 1927, all of which is being directed towards the land.

CHAPTER XXXII.—(Continued)

There was an instant babel of voices, and the rustle of those who, for their various reasons, must attempt the descent rather than remain at La Turbie during the night. Brandon, who had risen from his table, watched Joanna and Kenilworth. He saw that both of them turned immediately toward the foyer where Joanna had left her wrap. Then he slipped out the door and went to the big car in which Antoine awaited.

"As I expected," he said to the Monegasque, "she will not remain. Be ready to pull out when they approach their car. We want not more than two or three cars between us."

When Kenilworth and Joanna came out, many of the cars in the yard had already vanished in the fog, their horns echoing up from the road monotonously. An attendant was ordering departures, insisting upon an interval of two minutes between them. Brandon waited until Joanna, her wrap held close about her, her neck in her hand now, had climbed into the seat beside Kenilworth. Then he touched Antoine's arm, and, at the next signal from the starter, the big car slid away.

In the smaller car Kenilworth remarked grudgingly: "It'll be a test of nerve, but we'll make it if anyone does." The girl seemed to detect a note of dejection in his tone. She slipped her hand under his arm.

"I'm sorry, Roddy," she said. "You were wonderful, and I am conceited enough to think you meant all that you said. But you just didn't sweep me off my feet as I thought you might. I suppose there must be something old-fashioned about me after all. Your arms are awfully comforting, my dear, but I couldn't have the feeling that the thorns would just have to grow on them. I know you think I've treated you rotten, but I couldn't help it. I feel better, for it, too. I'm sure of myself, anyway."

"I don't know," he said, "but when you've got the right idea at that. Better than mine. I almost asked you to marry me, and that's wholly against my principles."

"I'm glad you didn't," she returned. "I'm afraid I might have given in to that."

The starter appeared at their running board and asked them to proceed. They crept noiselessly out of the parking yard. Until they came to the first turn, some sixty yards away, the flickering lights from the club house aided them. Then, when they had swerved sharply to the left they were wrapped in wet, almost impenetrable obscurity. Ahead they could see only the faint glimmer of their own headlights.

Twice they bumped into cars stalled at the inner side of the road. Each time they were called out by members of a party going back about—even women in fragile slippers and delicate gowns already soggy from the damp—rather than fight the descent any longer.

The red car nosing downward at a snail's pace, struck a stump. "It was foolish of me to let you attempt to go down," Joanna declared. "Before we are too far away we must walk back. The car will be as safe at the side of the road as are the others being abandoned."

"If we have to walk," Kenilworth replied firmly, "it will be straight ahead. I'll get you down if I have to carry you."

"But it's utter folly!" she protested. At that moment another group, two women and a man stumbled by them, feeling their way back to the summit. "See," she exclaimed, there are more who have given it up. We can walk back, dry out and wait for daylight. People below will understand."

He stubbornly negotiated another corner. When the car was crawling again he spoke, grudgingly.

"There isn't enough clarity in the whole world in the part of it you and I inhabit to make room for any sort of decent understanding of how a pretty woman might be caught and remain till daylight on La Turbie. You can stand a mysterious escape in the night with Prince Michael, but not with me in the mist at a mountain top club house where

you have to wear a mask to save your face. Some could; with some it wouldn't matter; you couldn't and you count."

She bit her lip, and was silent. With a petulant gesture she brushed away the moisture that hung in great, glinting beads on her eyelashes. Suddenly she was startled by a light that appeared weirdly in the middle of the road almost at their front wheels, waying slowly to the right and left.

"Somebody smashed I suppose," Kenilworth muttered and, jamming in his brakes, brought the car to a stop. Heavy, forbidding faces emerged from the fog on either side of them. Joanna cried out. Kenilworth with an oath, lunged across at the head of a man who reached in to her, but his arms were seized in an iron grip and twisted dexterously behind him. A cultured voice, speaking a mixture of Monegasque and French, commanded:

"Monseigneur and Mademoiselle will be good enough to step from the car."

"Like—!" Kenilworth exclaimed, and struggled, but the grip on his arms left him powerless. The lantern was brought closer. By its pale light they saw that a dozen men surrounded the car and that firearms gleamed dully in their hands.

After her first cry of alarm Joanna sat rigid. Something of her fright shone in her eyes, and Kenilworth was conscious that her face was pale. Otherwise she gave no sign. The gruff voice of the leader of the evil crew was heard again:

"It was ordered that you both descend. We have not great patience. The mademoiselle need not fear."

Kenilworth advised Joanna to step out quietly. "We must go through it, I suppose," he grumbled. "They probably will rob us with a thousand pardons and then politely let us go. These mountain brigands are thorough gentlemen as a rule."

The one who had been holding on to Joanna's wrists released them when she was in the road. She ran around the car to Kenilworth's side and from this position glared defiantly at the footpads who surrounded them. One of them caught the red sparkle of the enormous ruby that lay against her throat, from which her wrap had fallen. She instinctively flung up her hand to cover it. The bandit snatched and bowed gallantly. "A pretty thing, mademoiselle," he said in the native patois. "Mademoiselle's neck does not require such an ornament however!"

Kenilworth cursed at him, which only brought another ironic bow. The men closed in around the pair and they were ordered to walk with them. They were marched off the road past a hut which Kenilworth recognized as the one before which the big car ahead of them for the first portion of their ascent, had stopped and dropped behind them. Behind the hut they entered a cluster of pine trees and then crossed an open space of soggy bush scrub. A low barn-like building loomed out of the mist before them, and they were ushered through a narrow door.

Inside the building was a startling scene. In the dim light shed by a dozen lanterns placed about the earthen floor they saw half a dozen men and women whose costumes and dominoes proved to have been revelers at the club house, lined up against the walls, the men standing stiffly at one side, their hands bound behind them, women in an excited group. Armed ruffians guarded the women at one side, and the sullen men at the other. Kenilworth was ordered to take his place among the men. For a brief moment he gave a sign of attempting fight, but Joanna murmured a reassuring word to him and without awaiting the command from their captors, moved over to join the group of women.

As Kenilworth had prophesied, the bandits robbed their victims with protease apologies uttered in their guttural tones. They seemed however, to be strangely inefficient in their plundering. The man whose hands explored Kenilworth's inner pockets did not discover his wallet, in which was a sizeable sheet of bank notes, nor his platinum and diamond studded watch in the watch pocket beneath his waistcoat. A few gold loaves, and an English pound note in his change pocket was confiscated. His pearl dress studs were not noted. Curiously, he observed that the other robbers, relieving the other men of obvious valuables, ignored costly pearl studs. On the lapel of one victim, a

"I want to help" says Allen Boudria

Tells facts from own experience to help others. Almost wild with pain, weak and run-down, he won new health and strength through Tanlac

Allen Boudria, engineer, of 132 St. Patrick St., is one of Ottawa's best known citizens. "My purpose in telling the facts of my experience," he said, "is to help others who suffer as I did."

"For five years I was in misery. My whole system seemed out of gear, but my stomach troubled most. Even a drink of cold water would cause my stomach to bloat and swell abnormally. Gas would prevent me from sleeping at night so that I had to get up and walk the floor for hours. Violent stomach pains nearly drove me wild. I've seen times when I was doubled over, unable to straighten up."

"My friend M. Lapointe told me how Tanlac had helped him out of similar trouble, so I got some and used 20 bottles in all. It just made me over. I feel 30 years younger than I am, and weigh 214 lbs. My appetite and sleep are both fine. I eat what I like and sleep like a top. Tanlac and nothing

else, made this great change. I'm for Tanlac."

If overwork or neglect have worn you down get Tanlac, the great natural tonic made from roots, herbs and barks. Your druggist has it. Over 52 million bottles sold.

any decoration built around a huge diamond, was unnoticed.

(To be continued)

A GOOD MEDICINE FOR SPRING TIME

Do Not Use Harsh Purgatives—
—A Tonic is All You Need

Not sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite feeble, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in the spring is a tonic that will enrich the blood and build up the nerves. Dr. Williams' Pink Pills do this speedily and surely. Every dose of this medicine helps to enrich the blood which cleans the skin, strengthens the appetite and makes tired, depressed men, women and children active and strong. Mr. James Dickson, West-Beath, Ont., says: "I was quite badly run down, easily tired, and appetite poor. My blood seemed thin and watery. I decided to try Dr. Williams' Pink Pills, and after taking a few boxes I felt myself thoroughly built up and as strong as ever. I can recommend the pills to run down people."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Mystery of the Towers

Built in England During the War But Were Never Used

The mystery of two huge towers, built on the south coast of England during the war and never used, has been cleared up.

The towers, 80 feet high and built at a cost of approximately \$5,000,000 each, were to be the tower-anchors in many similar ones for the defence of the English Channel.

They were to be towed out to sea and strung together across the Straits of Dover, linked together at distances of a few hundred yards with nets and heavily fortified with guns. In the top of each a powerful searchlight was to be placed.

The armistice, however, made it unnecessary to continue the scheme and the towers were anchored off Shoreham for some years. One has been broken up and the other is used as a lightship off Spithead.

According to Sir W. Arbuthnot Lane noted British surgeon, fair-haired persons are more able to fight against disease than dark-haired ones.

Not Always a Good Rule

The idea that a man is as old as his birthday is one that is fast disappearing. There are too many eminent men beyond the psalmist's span to hold to such a principle. Birthdays, alone, are poor way to judge a man or a woman. Many men of ripe years are also of ripe intellect and judgment, while many men and women never reach that stage.

It is suggested that judges be compulsorily retired when they have reached the age of seventy-five years. That does not seem to be a good rule. A judge, particularly may have gained a wide outlook in his service which would be missed on the bench.

The worms that infest children from their birth are of two kinds, those that find lodgment in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with work havoc there. Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

Little Helps For This Week

If ye love Me, keep My commandments. John XIV, 15.

Do as thou wouldst be done unto; Love God, and love thy neighbor; watch and pray; These are the words and works of life; this do; And live; who doth not this hath lost heaven's way.

—Henry Vaughan.

When a man is told that the whole of religion and morality is summed up in the two commandments, to love God and to love our neighbor, he is ready to cry, like Charaba in Gohri, at the first sight of the sea, "Is this the mighty ocean? Is this all?" Yes, all; but how small a part of it do your eyes survey! Only trust yourself to it, launch out upon it sail abroad over it, you will find it has no end; it will carry you round the world.

—Julius Hare.

There is an automobile for every five persons in the United States. At this ratio there is one for almost every family.

Free Treatments For DEAFNESS

Head Noises from Nasal Catarrh

Hearing Restored

I have an original home treatment for deafness and head noises from nasal catarrh which I want every sufferer to try free—without obligation. For many years I suffered from catarrhal deafness and head noises. I perfected a treatment which completely restored my hearing. I gave it to others and they were able to hear again. Since that time, hundreds have used it successfully.

Dr. W. O. Coffee

This Is FREE

I feel so sure that this treatment will restore hearing and end head noises from nasal catarrh that I want every sufferer to try it free. I want to prove at my expense that the results are quick and convincing.

It is the best treatment that I have found in 42 years' practice as eye, ear, nose and throat specialist.

25,000 Treatments To Be GIVEN AWAY This Month FREE

These treatments cost you nothing. The results are quick and convincing. You will feel the difference the first day. I have found that 90 per cent of the cases of deafness and head noises are caused primarily by nasal catarrh. It often affects the stomach, causes rheumatism and many other troubles. Usually one ear is affected first, the deafness grows worse with every severe cold until the other ear is affected. My original home treatment will stop all this. I have restored hearing in many extreme cases; one woman had been growing deaf for 45 years; a man 80 years old who had been deaf for many years can now hear again. Hundreds

TRY IT FREE

In addition, I will send you absolutely free my new book on Deafness, Head Noises and Catarrh. It discloses fully the curable and incurable kinds of deafness. Write today for this free test treatment. State if you are deaf, have head noises or just nasal catarrh or head catarrh. Write or print your name plainly. Do not delay. This notice may not appear again. For 20 days I am going to give away 25,000 free treatments.

CARBON UNION CHURCH

SUNDAY SCHOOL 11 A.M.
EVENING SERVICE 7.30
All Heartily Welcome
MINISTER—REV. JAS. McKEVEY

Antwerp, Belgium. — When the Canadian Pacific steamer *Melita* arrived recently, she was given an official welcome and a great popular demonstration as the ten thousandth vessel to enter the port of Antwerp this year. An elaborate programme was arranged in her honor.

Saint John.—Moose are reported nearly three times as plentiful this year than last in the Tobique district, according to Burton L. Moore, well-known guide. The rapid increase of these big game animals points to migrations into the territory. Guides and sportsmen have not yet decided the source of the movement.

A great service to the travellers on the C.P.R. lines will be put into effect with the first sailing of the winter season of the C. P. liner "Melita," when for the sailings of C. P. liners from Saint John to Europe between December 1st and April 12th, through tourist sleeping cars will be operated on C.P.R. trains from Winnipeg direct to the ship's side at the New Brunswick port.

Desirous of popularizing old French-Canadian folk songs among the English-speaking people of this country, the National Council of Education, on the initiative of Major F. J. Ney, made recent arrangements with Charles Marchand, well-known singer, for a comprehensive tour of the Canadian west. The folk songs which Mr. Marchand will render in English have been specially translated by J. Murray Gibbon, dean of publicity of the Canadian Pacific Railway.

Diversion of six miles of Canadian Pacific Railway tracks has now been completed and raising of three additional miles of tracks is under way in the Gatineau Valley, according to word received at headquarters of the company recently. This diversion has occurred between Mile 8 and Mile 14, and affects the stations of Tenaga, Kirk's Ferry, La Charite, Bennet, and Cascades, well-known summer resorts in that district, while the station affected by the raising of the tracks is that of Farm Point. The work has been in progress since April of this year.

APPLE SAUCE

Father—How did you get on at your arithmetic examination?
Son—Very well father.
Father—How many sums did you have wrong?
Son—Only one.
Father—Good. How many were there?
Son—Twelve.
Father—Splendid! And the other eleven were all right?
Son—Oh, no I didn't do them.

Porter—Miss, your train coming.
Haughty Passenger—My man why do you say, your train when you know it belongs to the company?

Porter—Dunno miss. Why do you say my man when you know I belong to my wife?

Of course, said a husband who made a specialty of manufacturing excuses, the truth is bound to leak out some time. Yes said his wife and I am inclined to believe that it leaked out of you long ago.

The local doctor passing the carpenter's shop thought it would be a good thing to have a joke at Pat's expense, said:

Paint and putty cover a lot of your bad work.

That may be so, your honor, replied Pat, but spade and shovel cover a lot of yours.

They say that people with opposite characteristics make the happiest marriages

Yes; that's why I'm looking for a girl with money.

Winnie—Would you marry a man to reform him?

Minnie—I suppose I shall have to. There isn't one of them that suits me just as he is.

Carpenter—Didn't I tell you to notice when the glue boiled over?

Assistant I did. It was a quarter past ten.
